

EVERFLOW™

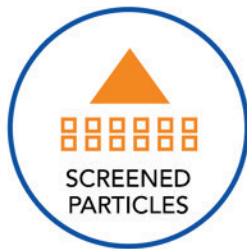

EverFlow feed mixing salt is a sodium chloride salt crystallized by solar evaporation. This high quality crystallized salt is washed, dried, and screened into a highly flowable product for mixing in animal feed.

EverFlow is dried to a very low moisture level of .03% or lower. After drying it is processed with a proprietary methods to enhance flowability, then packaged in a manner to avoid increase in moisture.

EverFlow has proven itself to be the most flowable salt in the feed industry.

**THE DIFFERENCE
IS FLOWABILITY.™**

Blended & Packaged in the USA
